### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 25. (Currently Amended) A circuit board having a signal interconnect post, comprising: a filter receiver loop in which interfering signal can be induced and comprising an electrical filter circuit connected to the post to filter ~~filter~~ conducted interfering signals traveling through the post; and suppressor receiver loop in which noise suppression signals can be induced, wherein the receiver loops are oriented such that the respective interfering and noise suppression signals are induce by a same external field and travel in opposite direction through a shared conductive path.

The following is an examiner's statement of reasons for allowance: With regards to claims 25-41, the prior art of record does not disclose or fairly teach the receiver loops being oriented such that the respective interfering and noise suppression signals are induce by a same external field and travel in opposite direction through a shared conductive path. With regards to claims 42-49 and 51-55, the prior art of record does not disclose or fairly teach a second receiver loop, comprising a conductive coating adhered to surfaces of the decoupling circuit, and the conductive path, adapted to have induced therein a signal having a direction and magnitude sufficient to cancel at least a

portion of interfering signals induced in the first receiver loop. With regards to claims 56-62, the prior art of record does not disclose or fairly teach a plurality of ground lands radially spaced around and electrically connected to the electrical filter circuit, at least one of which is electrically connected to the filter circuit; and a conductive coating adhered to surfaces of the electrical filter circuit, wherein the electrical filter circuit shunts conducted interfering signals traveling through the interconnect post to the ground plane via the at least one ground land.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kimberly E. Glenn whose telephone number is (571)-272-1761. The examiner can normally be reached on Monday-Friday 7:30 to 4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Pascal can be reached on (571)-272-1769. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
